

Protect Every Load, Empower Every Broker with Highway and Tai TMS

Highway, embedded within Tai TMS, empowers brokers and carriers to build and sustain mutually trusted relationships by going beyond onboarding—delivering Carrier Identity® verification, continuous compliance, proactive monitoring, and real-time fraud protection without leaving their workflows.

The integration delivers real-time carrier insights, continuous compliance checks, and automated fraud protection at every stage of the load. From onboarding all the way to delivery, Highway and Tai give teams the tools to move strategically, reduce risk, and build a more reliable carrier network.

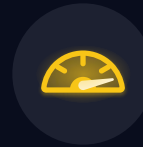

Identity-First Foundation

Solve the root problem of freight fraud—identity—by requiring carriers to prove who they are, their authority to act, and their equipment before any transaction moves forward.

Access Trusted Capacity

Increase carrier utilization and boost productivity by procuring identity-verified carriers directly through the Trusted Freight Exchange (TFX).

Accelerate Onboarding

Onboard carriers in minutes with verified data syncing directly into Tai TMS for faster, frictionless setup.

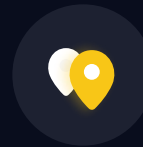

Load-Level Compliance

Maintain verified carriers at the load level with adaptive, real-time monitoring, catching risks and changes from tender through delivery.

Protect Rate Confirmations

Reduce risk of compromised inboxes and email spoofing with secure rate cons with two-factor verification and digital acceptance.

ELD-Powered Visibility

Automate assignment, geofencing, and reliable tracking with dynamic location based visibility from pre-pickup through final delivery.

Why Integrate with Highway?

Integrating Highway into Tai TMS turns compliance, fraud prevention, and identity verification into automated background processes by eliminating redundant tools, letting your team focus on booking more loads with confidence.

90% Elimination of manual processes

92% Reduction in freight fraud

30% Increase in Booking

"With Highway, we can spot problems before they even start. That's the difference. Most people don't realize there's an issue until it's already happening—but Highway gives us the visibility to make smarter decisions early."

BRODY MUELLER | OPERATIONS MANAGER AT HEADWALL LOGISTICS
